

Tobacco Consumption Analysis (2000-2023)

Exploratory Data Analysis and Key Insights

Roberto Cuellar Gomez

Data 110

December 16, 2024

Introduction

This Project will explore:

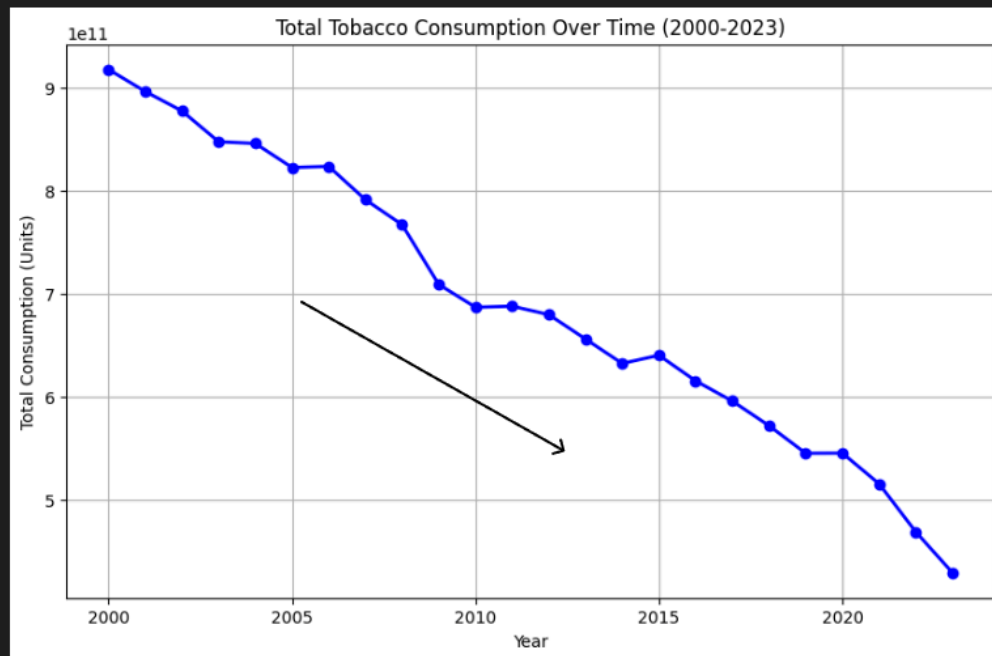

The U.S. tobacco consumption data from 2000 to 2023 (Domestic and Imports).

The objective is to:

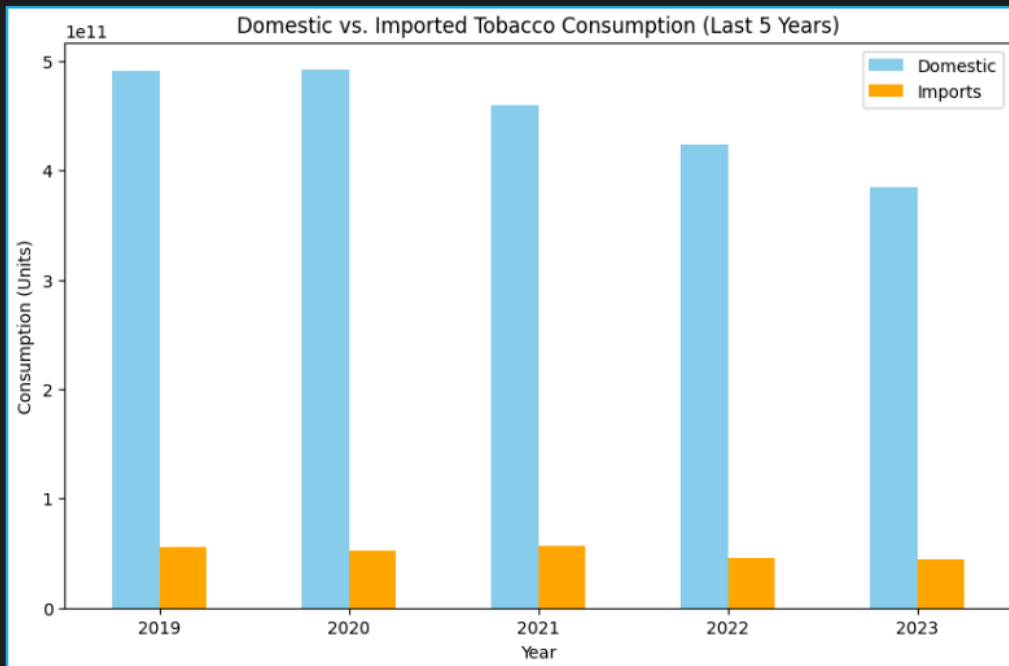

Analyze trends in Tobacco Consumption, and understand them as is crucial for public health studies

Total Tobacco Consumption (200 - 2023)

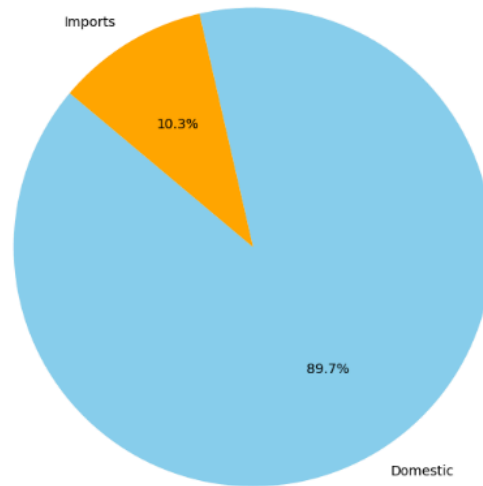

Domestic vs. Imported Tobacco

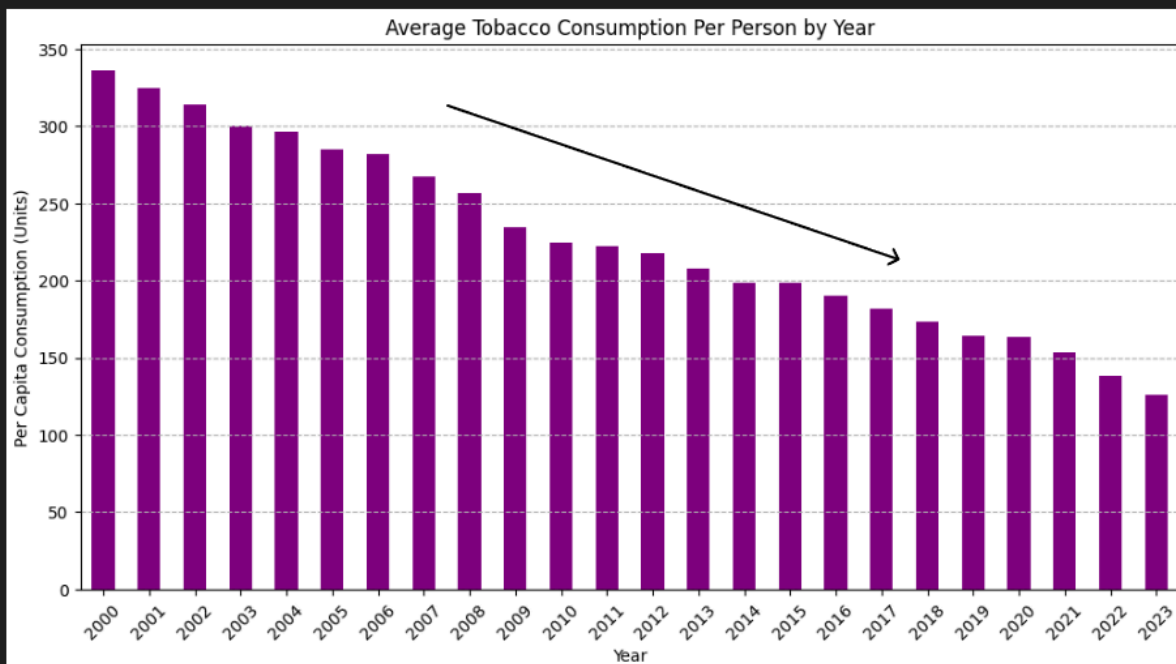

Domestic vs Imports (2023)

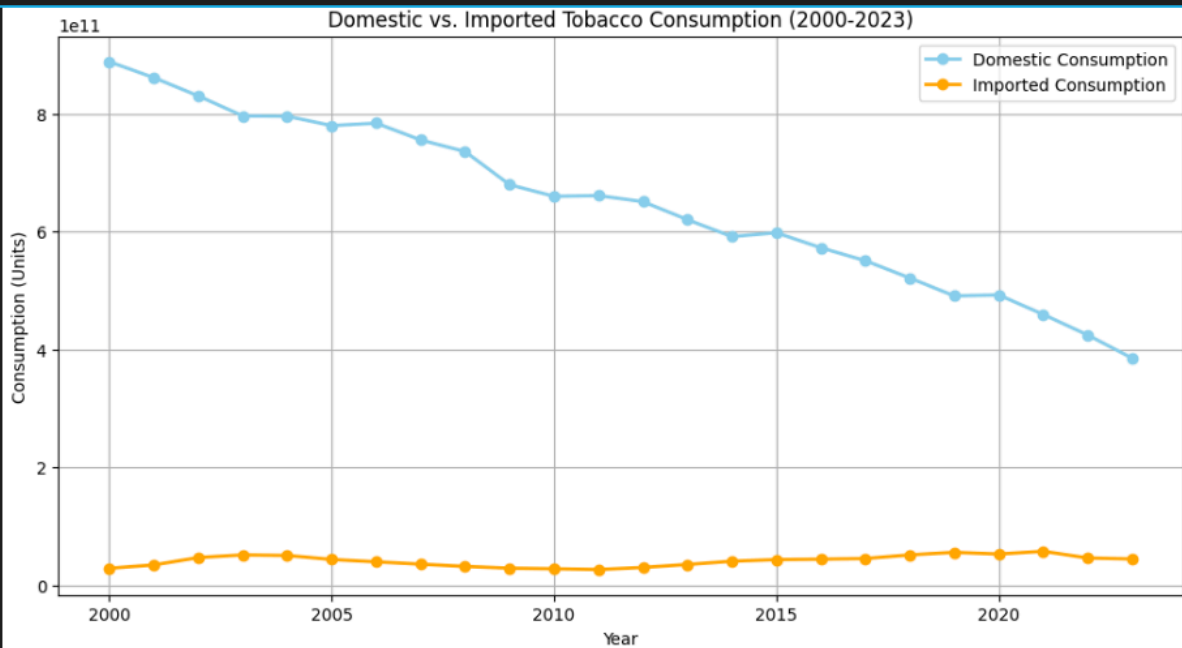

Domestic vs. Imported Tobacco Consumption in 2023

Average Consumption Trends

Domestic vs. Imported Consumption Trends

Conclusion

Key Takeaways:

Overall Decline: Total tobacco consumption has significantly reduced since 2000.

Domestic Dominance: Domestic consumption is the main driver but is also declining.

Future Research

- Investigate regional differences.
- Explore the role of e-cigarettes and alternative tobacco products.
- Examine specific policy impacts (e.g., taxation, smoking bans).
